Digital Natives – future users of library of Google?

- Marc Prensky created the term “Digital Natives” in 2001. Digital Natives are people who grew up immersed in technology. They never knew a time before personal computers or recorded television. Most people born after 1980 qualify as Digital Natives but some born even earlier may also be Digital Natives, depending upon their immersion in new technology. By age 20, these Digital Natives will have spent 20.000 hours online, buying from Amazon, selling on eBay, downloading from iTunes and doing things which were not possible before.
- Everyone else is a “Digital Immigrant,” and has to adjust to this new landscape. Even though we, as Digital Immigrants, created the current technological environment, we consistently give ground to Digital Natives

What digital natives want from the library

15th VALA Conference and Exhibition in Melbourne Australia. VALA -- Libraries, Technology and the Future Inc. was launched with an video about Abbey:

http://www.youtube.com/watch?v=7_zzPBbXjWs

VALA is an independent Australian based not-for-profit organization that promotes the use and understanding of information technology within libraries and the information sector.

What digital natives want from the library

- Abbey is a 3 year old digital native. This is what she wants from her library.
- “Hi, I’m Abby and I love libraries and books and story time but I’m a digital native and I want an online library that learns what I like, that has lots of multimedia. I want everything to be quick and easy. I want to be able to add my own stuff and share other peoples stuff. I want to be able to do it all from my iPhone or my ebook reader. I want even more mashed up content, semantic tagging, real time information, augmented reality, geospatial tagging...”
- Libraries should adapt to the needs of these users

National Library Kazakhstan

Rolex Learning Center – EPFL of Polytechnic school of Lausanne

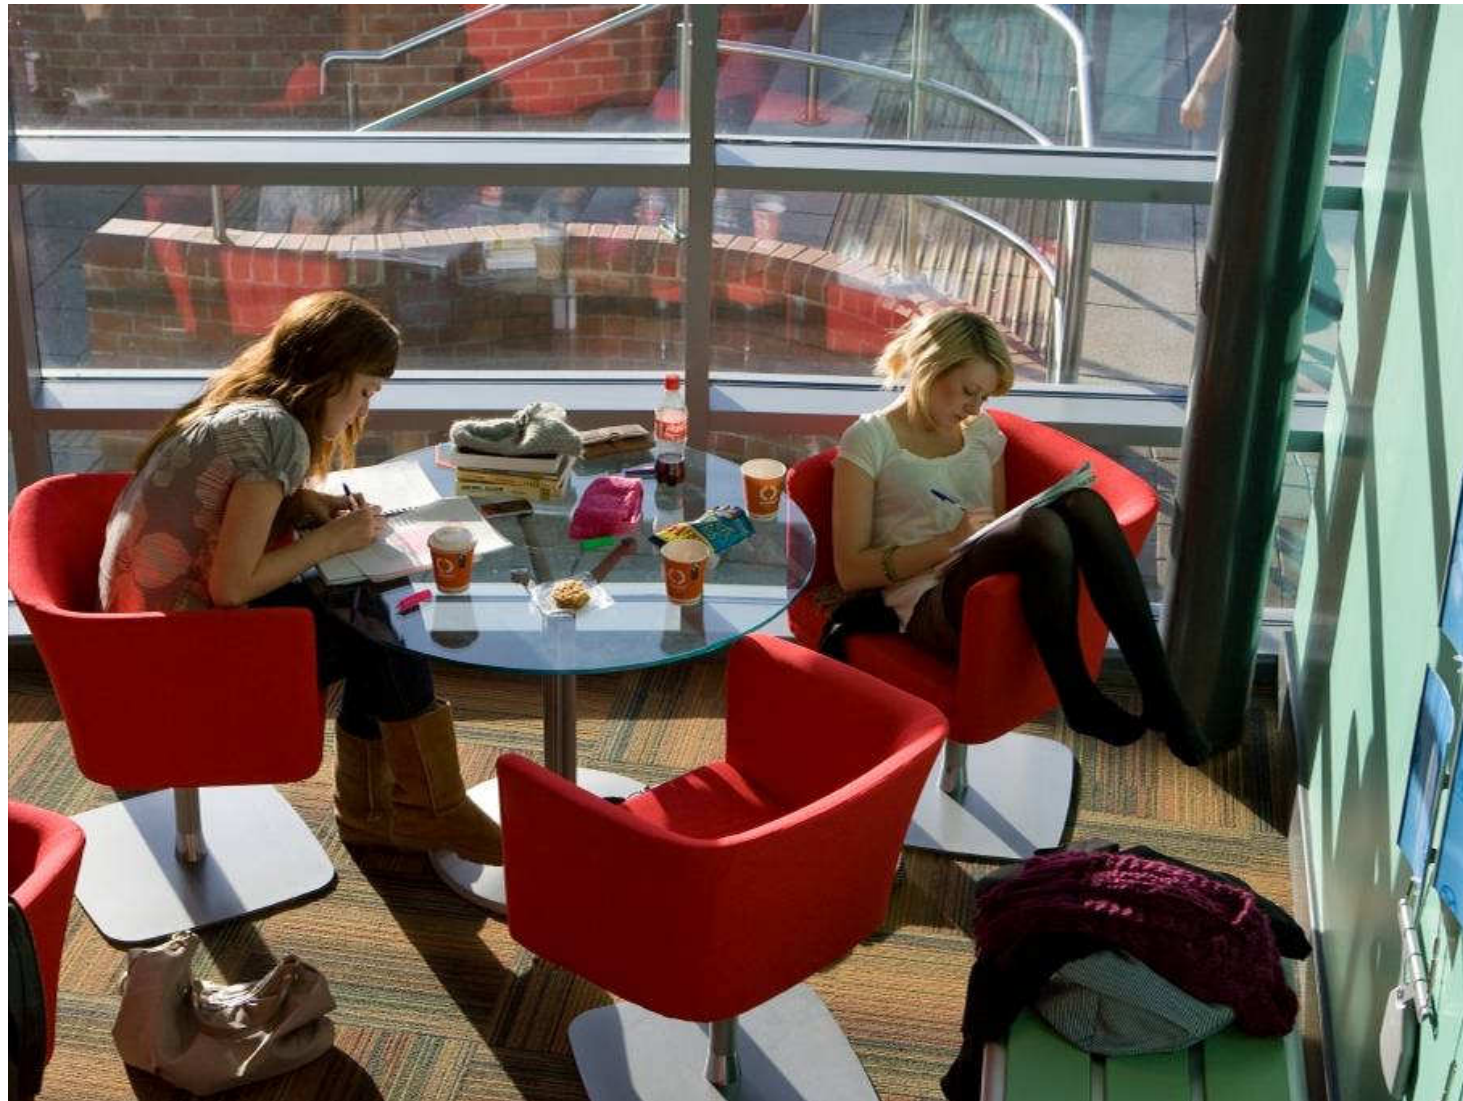

Open 7:00-midnight, 7 days a week. It has living spaces: 3 restaurants, one bookstore, one bank, substantial work space for individuals and groups, automated loan facilities (RFID), 11 000 ejournals, 20 000 ebooks, with relaxing spaces to learn and work

Rolex Learning Center - EPFL

Sheffield Hallam University Learning Center

Qatar Foundation Central Library

The Central Library under construction in Qatar will become an outstanding academic, research, public and national library. This Library is designed as one open space with an integrated loan system, an automatic book mover and smart shelving system etc. Estimated cost US\$250 million (190 million euros).

In students' minds, what are three ways the
“open web” (i.e., Google, etc.) is better than libraries?

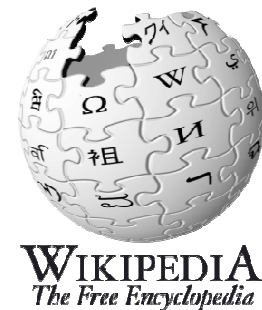

1.) A single search box for everything

2.) Real-time news

3.) A massive encyclopedia (Wikipedia) with entries
in English (3,679,000), German (1,257,000),
French (1,124,000), and 32 other languages

Nowość! Multiwyszukiwarka na UW. Jedno okienko - wiele widoków.

Wpisz hasło wyszukiwawcze ze swojej dziedziny i sprawdź jak to działa! Multiwyszukiwarka daje możliwość przeszukania większości baz udostępnianych na UW oraz katalogu Bibliotek UW. Odnajdziesz publikacje na potrzebny Ci temat szybko, łatwo i w jednym miejscu.

Odkryj każdą z czterech nowych zakładek: 1. multiwyszukiwarkę, 2. szybki dostęp do listy czasopism elektronicznych A do Z, 3. wyszukiwanie w katalogu (na takiej samej zasadzie jak na Facebook'u BUW) oraz 4. Inne - e-książki i bazy, których nie uwzględnia multiwyszukiwarka.

Instrukcja wyszukiwania

Mija półtora miesiąca odkąd w BUW działa multiwyszukiwarka. Czy przydaje się ona do Państwa pracy naukowej? Czy warto, aby zagościła w BUW na stałe? Potrzebna jest Państwa opinia, dlatego prosimy o wypełnienie do 12 czerwca krótkiej ankiety.

- Everything indexed in the catalog will be available for discovery searching

EBSCO Discovery Service (EDS)

“EDS Core Index”

- The Base Index forms the foundation upon which each EDS subscribing library builds out its custom collection
- Beginning with the Base Index, each institution extends the reach of EDS by adding resources including its **catalog, institutional repositories**, EBSCOhost and other databases, and additional content sources to which it subscribes
- The EDS Base Index is comprised of metadata from the world's foremost information providers; content from approximately **20,000 providers** (and growing) in addition to metadata from another **70,000 book publishers**
- Nearly **50,000** Magazines & Journals (list attached)
- Nearly **6 million Books** and approximately 825,000 CDs & DVDs
- More than 100 million newspaper articles, more than 400,000 conference proceedings and hundreds of thousands of information sources from various source-types:
 - Biographies, Book Summaries, Case Studies, Company Profiles, Conference Papers, Congressional Documents, Country Fact Sheets, Country Reports, Dissertations, Educational Reports, Essays, Financial Reports, Government Documents, Grey Literature, Health Reports, Industry Reports, Law Documents, Market Research Reports, Newspapers, Newspaper Columns, Newswires, Pamphlets, Primary Source Documents, Reviews, State/Provincial Fact Sheets, Study Guides, SWOT Analyses, TV & Radio News Transcripts, Working Papers...and more.

Global warming will affect the **genetic diversity** and uniqueness of *Lycaena helle* populations.

fragmentation
Lycaenidae
microsatellites
mountain regions

Abstract: The climate **warming** of the postglacial has strongly reduced the distribution of cold-adapted species over most of Central Europe. Such taxa have therefore become extinct over most of the lowlands and shifted to higher altitudes where they have survived to the present day. The lycaenid butterfly *Lycaena helle* follows this pattern of former widespread distribution and later restriction to mountain areas such as the European middle mountains. We sampled 203 individuals from 10 populations representing six mountain ranges (Pyrenees, Jura, Massif Central, Morvan, Vosges and Ardennes) over the species' western distribution. Allozyme and microsatellite polymorphisms were analysed to study the **genetic** status of these highly fragmented populations. Both molecular marker systems revealed a strong **genetic** differentiation among the analysed populations, coinciding with the orographic structure and highly restricted gene flow among them. The large-scale **genetic** differentiation is more pronounced in allozymes (F_i 0.326) than in microsatellites (R_i 0.113), but microsatellites show a higher resolution on the regional scale (R_i 0.082) compared with allozymes (F_i n.s.). For both analytical tools, we found private alleles occurring exclusively in a single mountain area. The highly fragmented and isolated occurrence of populations is supported by the distribution pattern of potentially suitable climate suggested by species distribution models. Model projections under two climate **warming** scenarios predict a decline of climatically suitable areas, which will result in the extinction of most of the populations showing unique **genetic** characteristics. Zintegrowane przeszukiwanie większości e-zbiorów UW oraz Katalogu Bibliotek UW.
 [Szukaj](#)
 Wejście z komputerów domowych dla pracowników i studentów UW [\(Więcej\)](#)
Nowość! Multiwyszukiwarka na UW. Jedno okienko - wiele widoków.
Wpisz hasło wyszukiwawcze ze swojej dziedziny i sprawdź jak to działa! Multiwyszukiwarka daje możliwość przeszukania większości baz udostępnianych na UW oraz katalogu Bibliotek UW. Odnajdziesz publikacje na potrzebny Ci temat szybko, łatwo i w jednym miejscu.
Odkryj każdą z czterech nowych zakładek: 1. multiwyszukiwarkę, 2. szybki dostęp do listy czasopism elektronicznych A do Z, 3. wyszukiwanie w katalogu (na takiej samej zasadzie jak na Facebook'u BUW) oraz 4. Inne - e-książki i bazy, których nie uwzględniła multiwyszukiwarka.
Instrukcja wyszukiwania
Mija półtora miesiąca odkąd w BUW działa multiwyszukiwarka. Czy przydaje się ona do Państwa pracy naukowej? Czy warto, aby zagościła w BUW na stałe? Potrzebna jest Państwa opinia, dlatego prosimy o wypełnienie do 12 czerwca krótkiej ankiety.
BUW dla sów i nocnych marków
Od niedzieli do piątku w dniach 29 maja - 17 czerwca 2011 r. BUW będzie czynny do godz. 5.00 (czyli do pierwszego porannego

Loading OPACs & Institutional Repositories

- OPAC formats supported
 - MARC21 most common, EDS has a framework to handle in a streamlined/automated fashion
 - Others such as KORMARC, UNIMARC , MARCXML, UNIMARC XML, etc supportable or in process
- Institutional Repositories
 - Those available via OAI-PMH and in Dublin Core format are most common, and EDS has a framework to handle in a streamlined/automated fashion (*these are free!*)
 - Can also receive IR Dublin Core XML files via FTP
 - Others such as METS/MODS format etc will be supportable or in process
- Frequency can be dictated by customers, typically is weekly or ad-hoc

Institutional Repositories

The EBSCOhost Integration Toolkit enables users to integrate EBSCOhost search applications, corporate portals, and intranets with their information professionals and IT experts to provide employees with the best content in the optimal online environment... the one already in use!

Web Service

EBSCO Web Service is a SOAP and REST compatible Web service used to establish direct links from an ESA to databases from EBSCO. The web service can be used, for example, to build custom a EBSCOhost business database search interface for a company portal.

RSS Feeds

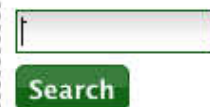

Users can set up continuously updating RSS-based content feeds from EBSCO databases. Use this to link directly to relevant content on a library homepage, for example. Links lead directly to the EBSCOhost Interface.

Search Box Builder

Choose your search parameters and customize your search box size and style to fit your site. Integrate it directly into your website to allow users to access premium content quickly! Multiple styles and customization options available.

Persistent Links

Users can embed persistent links to specific articles from EBSCO business databases into a portal or intranet. This feature can be used, for example, to provide links to company profiles on your portal.

Search Integration

Users see EBSCO results within an integrated result list in combination with other corporate and local content. Database metadata is available for local indexing, and can be integrated into commercial software products such as Google OneBox.

SharePoint

Embed the EBSCOhost experience or provide direct article access within SharePoint through Web Parts. Improve your company portal by integrating EBSCO's rich content directly into your interface.

eBooks on EBSCOhost

- EBSCO acquired last year NetLibrary - service that provides eBooks and Audiobooks to libraries around the world
- NetLibrary offers over 300.000 eBooks and over 17.000 Audiobooks
- Available in more than 20 different languages
- Accessible through EBSCOhost interface
- Content can be viewed online from any computer with access to the Internet, and may be downloaded and viewed on portable devices

Academic Search Elite

Academic institutions worldwide depend on this database as their core resource of scholarly information. *Academic Search Elite* contains full text for more than 2,100 journals, including more than 1,700 peer-reviewed titles. This multi-disciplinary database covers virtually every area of academic study. Full text information in this database dates as far back as 1985. This database is updated on a daily basis via EBSCOhost.

A Primer on Genetics, Genomics and Plant Breeding

Wilfred Vermerris

Genetics Institute and Agronomy department, University of Florida, Gainesville, FL, USA,
wev@ufl.edu

2.1 Introduction

The focus of this book, as the title indicates, is on the genetic improvement of bioenergy crops. Chapter 4 deals with the biochemistry and genetics of cell wall biosynthesis, and Chapters 7–15 focus on individual crops, with an emphasis on the breeding strategies that can be employed to improve these crops for bioenergy production. These chapters are written with the assumption the reader has basic knowledge of plant genetics and plant breeding. In order to make this book accessible to a broad audience, this primer is intended to provide basic background information on plant molecular genetics and plant breeding. The chapter is written for an audience with basic knowledge of biology and chemistry. Textbooks that offer a more detailed and extensive treatise on the various topics are referenced throughout the text. It should be possible to read the main Sections (2.2, 2.3, etc.) independently from each other.

These chapters are written with the assumption the reader has basic knowledge of plant genetics and plant breeding. In order to make this book accessible to a broad
